

**FLEXIBILITY AND
FUNCTIONALITY,
ARRAS SPINE BRINGS
PEOPLE TOGETHER.**

**ARRAS
SPINE™**

Herman Miller Asia Research & Development Team

1/

1/ Communal Channel Arras Spine services surrounding workspaces via a communal channel that provides all the essentials and makes them easy to use – power, technology, tools and accessories.
2/ Spinal Structure Engineered to exacting standards, the 400mm wide unit is counterweighted to offer the assurance of robust stability. Available in two heights – 550mm and 720mm – Arras Spine is readily aligned to any combination of desks and accessories.

3/ Ceiling Blade Mounted directly to the port, the new Arras™ Ceiling Blade distributes power and data cables from the ceiling to the workstation.

4/ Power Up Everyday necessities, such as access to power, are made easier and more satisfying by thoughtful engineering that puts user experience first.

The Arras™ power channel features pivot wings that open and retract smoothly into a vertical pocket, returning to the closed position with a soft reassuring click.

5/ In the limelight Arras Limelight's lofty height creates a stunning cathedral effect, while effectively illuminating the worksurface below. Fitted with LED lamps and an energy-saving motion sensor, this intuitive device switches on when you arrive, and off when you leave, consuming 50% less energy than conventional ceiling lights.

6/ Arras Honeycomb Readily customised with a range of colours and infills, Arras Honeycomb screens can create privacy and aid wayfinding. **7/ Arras Binder Bin** Available in two sizes, Arras Binder Bin can be specified with EchoPanel™ or cork substrate backs, providing a convenient pinnable surface. **8/ Arras Fabric Screen** Arras Fabric Screens allow you to personalise your workplace with a variety of patterns, colours and textures. **9/ Arras Planter** The Arras Planter features a moulded plastic liner to contain excess liquids, and naturally

creates permeable privacy between workspaces.

10/ Arras Tray The Arras Tray purposefully bridges workspace boundaries. More than a simple desktop accessory, it's a stylish sharing plate, drinks receptacle and desktop organiser in one.

11/ Arras Wood Screen Reminiscent of wood panelling, the Arras Wood Screen's naturally grained surface has immediate familiarity and appeal. **12/ Arras Glass Marker Screen** The Arras Glass Marker Screen utilises 12 mm laminated glass and provides an outlet for creative expression.

 **Arras Spine meets the future head on. In exploring a new reality - of the virtual, the cloud, tablets and smart phones, reduced real estate and increased mobility – Arras Spine provides real world solutions. It responds with a renewed enthusiasm for collaboration; for socially charged workspaces where people come to exchange ideas, co-create and reconnect.**

Freestanding and autonomous

Arras Spine supports multiple platforms, allowing the user to create any combination of open plan, public or private workspaces around it. Desks, tables and tools simply slide alongside.

And when needs change, components can be reconfigured quickly and easily. Arras Spine empowers the user with complete control over their domain.

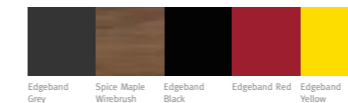

Colour Expression

Arras Spine is exquisitely formed, featuring smooth lines, rounded corners and a palette of inspiring colours to choose from.

Design for the Environment

The design of Arras Spine is guided and informed by Herman Miller Design for Environment protocol. Every component in Arras Spine can be easily disassembled for end of life management and no components are chemically bonded. Arras does not use of PVC or any other toxic material, has verifiable recycled content exceeding 50% by weight, and is BIFMA X7.1 certified as a low emission product that meets indoor air quality standards.
