

A modern building at night, featuring a large glass facade and a prominent coral sculpture illuminated from within. The building has a dark, angular roof and is surrounded by a paved courtyard with some low-lying plants and a wooden bench in the foreground. The word "Coral" is overlaid in large white text on the left side of the image.

Coral

Reminiscent of the underwater lifeforms that inhabit our oceans, Coral brings a geometric quality to any space. An object of substance and beauty which exudes a gentle, diffused light, Coral creates a warm and welcoming ambience. Coral is scalable in size and available in any number of configurations—ensuring it makes waves wherever you choose to place it.
